EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carl Reed on April 12, 2004.

The application has been amended as follows:

In Claim 18, line 13, please change "plurality" to --set--.

In Claim 18, lines 20, please change "third plurality" to --second set--.

The amendments overcome lack of antecedent basis problems.

2. The following is an examiner's statement of reasons for allowance: The prior art cited is the most relevant prior art known. However, the invention of claims 1, 11 and 18 distinguishes over the prior art for the following reasons. Gilliland et al. (previously relied upon) discloses a connector that electrically connects an optoelectronic transceiver module comprising a first plurality of pads that are used to communicate with a first receiver and a first transmitter, comprising first transmitter pads and first receiver pads (e.g. pin# 12, 13, 18 and 19). Gilliland et al. also discloses a set of pads (e.g. pin# 4, 5 and 6) used to communicate with the communications device. However, Gilliland et al. does not disclose a set of pads as claimed comprising second receiver pads and second transmitter pads. Furthermore, Gilliland et al. discloses the transceiver comprising only one transmitter and one receiver. The prior art, in

general, teaches transceiver modules comprising one transmitter and one receiver. Gilliland et al. does not disclose or reasonably suggest the transceiver module to comprises a second transmitter and a second receiver. Therefore one of ordinary skill in the art would lack any motivation for providing the claimed connector with second transmitter pads and second receiver pads for communication with a second transmitter and receiver since the optoelectronic transceiver module comprising a second transmitter and second receiver are not suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

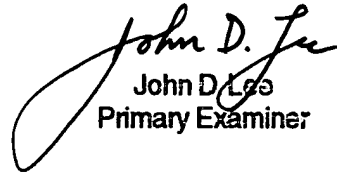

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarah Song whose telephone number is 571-272-2359. The examiner can normally be reached on M-Th 7:30am - 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rodney Bovernick can be reached on 571-272-2344. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
